

Sharper faster!

The new 34 series with 7" sunlight viewable screens.

SIMRAD
34/44/54
SERIES

Simrad's new 7, 10 and 15" screens deliver the sharpest images even in direct sunlight! Our new SimNet network ensures ultra-fast delivery of data between components!

Once you choose SIMRAD, the choices of quality Radars, GPS ChartPlotters, EchoSounders and Combo Units are endless. Bright 7, 10 and 15" screens, including the super-bright 10" SunView screens, can be used as stand-alone units or combined with each other — put a 7" on your flying bridge and a 15" in your pilothouse. SimNet's "Plug & Play" easily interfaces with our award-winning autopilots, instruments and DSC radios to create the ultimate marine electronics system.

- Radar/Chart Overlay & Synchronization
- Dual Range Radar
- SDGPS Accuracy
- Dual Waypoints on Radar
- Full Screen/Split Screen with 3 Windows
- Radar Power up to 12kW
- PrimePad for Intuitively Easy Operation

Trust what professionals trust!

"This equipment gives our captains the edge in finding fish and structures as well as safely navigating to and from our port."

Capt. Andrew Mezirow
World record holder & charter captain of Crackerjack uses Simrad's CE44 GPS chartplotter/Echo sounder, RA42 Surface Radar, CM60 Bathymetric mapping computer, RD68 VHF radios and AP35 Autopilot
